

Metallgiesserei Wilhelm Funke GmbH & Co. KG

As a medium-sized company, we are your partner for the development of individual parts, small series and prototypes with a broad range of European customers.

Thanks to the flexible orientation of our design, the machinery and systems, in the model making department, our foundry and the mechanical treatment as well as with our well-trained and highly motivated employees we are able to realise sophisticated products with high quality from your idea to the finished product.

Data consistency and a certified quality management from the inquiry to the delivery of your casting ensure a high manufacturing level.

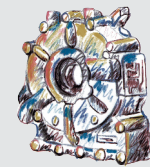

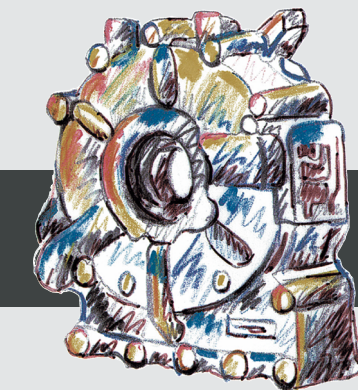

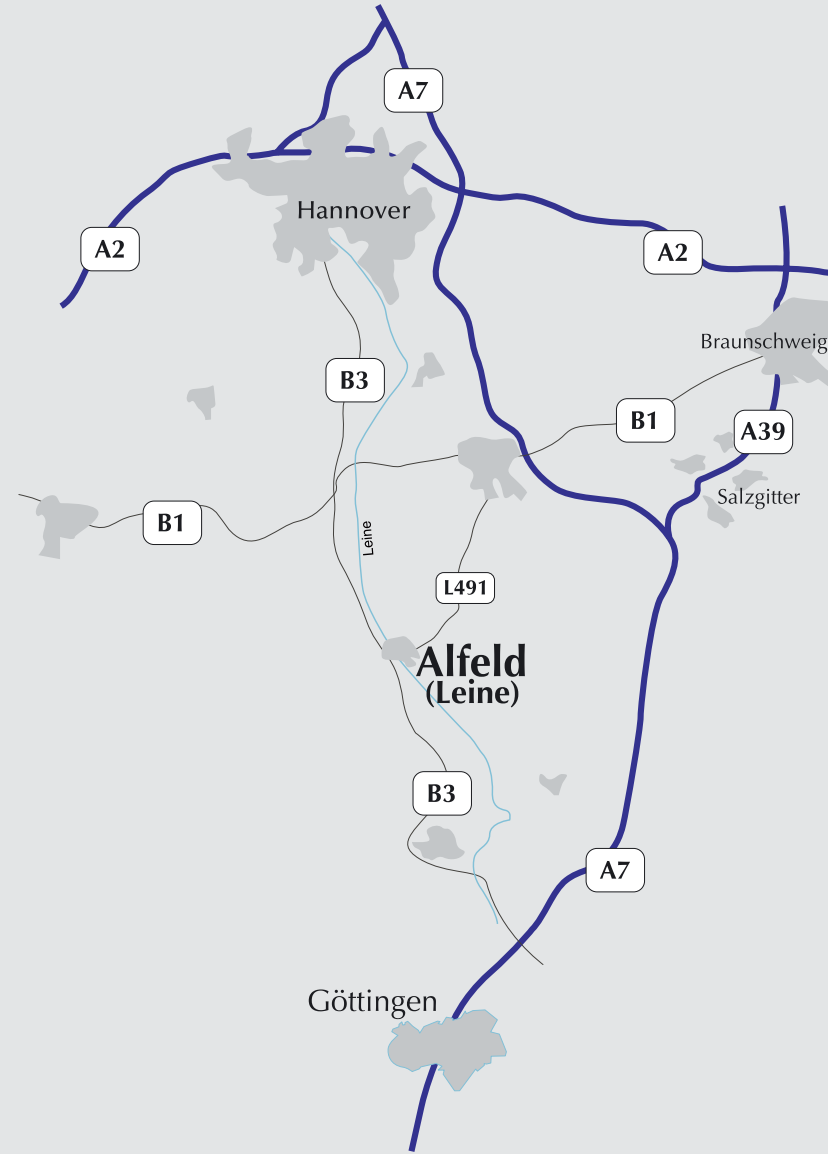

In our company, you will meet skilled experts who are familiar with modern technologies. Tradition and technology form the quality which meets your requirements.

Certified quality management system
DIN EN ISO 9001
DIN EN 9100 (aerospace sector)

METALLGIESSEREI
Wilhelm Funke
GmbH & Co.KG

Design / Development

- Casting simulation
- Tool design
- Rapid prototyping
- Digitisation
- Surface reconstruction
- Reverse engineering

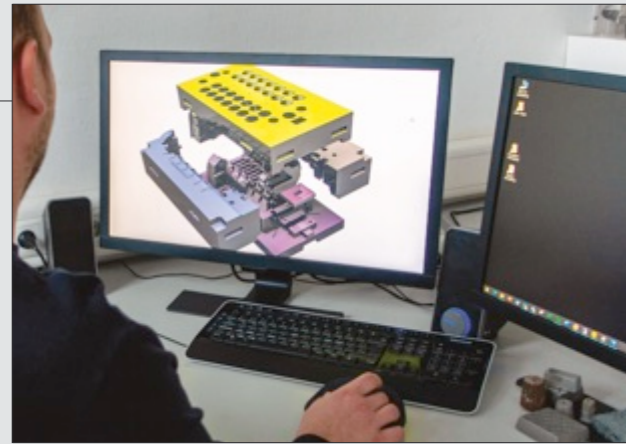

Foundry

- Gravity die sand casting
- Aluminium / magnesium
- Heavy metal
- Synthetic casting
- Hand moulded casting
- Prototypes and small series

Quality assurance

- DIN EN ISO 9001
- EN/AS 9100 (aerospace industry)
- Optical and tactile measurement
- Material inspection (NDT / DT)
- X-ray inspection
- Crack testing

Production model making

- 6 metres portal milling machine
- Large model making
- Repair and modification of models
- Mould, jig and gauge construction
- 3D-printing
- Illustrative model making

Mechanical treatment

- 5-axes machining centres
- CNC turning
- Component assembly
- Complete machining
- Air conditioning manufacturing
- CAM programming
